

Report on Alumni feedback on curriculum

IQAC of the college collected feed back on curriculum from alumni through online mode. A questionnaire designed by the members of the IQAC was used for obtaining the responses of students at undergraduate and postgraduate level. The questionnaire included questions related to various aspects of curriculum, teaching learning strategies adopted, effectiveness of the programme to pursue higher studies in the subject, career prospects etc. The collected data was analysed and the findings are as follows:

Many of the students rated the quality and depth of syllabus of the entire programme as very good. Majority of the students were satisfied with the teaching-learning strategies adopted and were impressed with course transaction. A substantial majority considers the programme to be effective in inspiring them to pursue further studies in the subject. The extent of contribution of the programme to career prospects is rated as excellent by few and very good by many.

An overview of the feedback data shows that the alumni seem to be satisfied with the existing curriculum. The institution hopes to convey their suggestions and concerns to higher authorities so that the curriculum is more beneficial for students in future.
